

# FORAGE SORGHUM HYBRID SEEDS

## MULTICUT

(Sorghum X Sudan Hybrid)

### High Energy feed

- .Use for grazing,hay silage or green chop**
- .Excellent dry matter production**
- .High protein and energy content**
- .Disease and drought resistant**
- .Grazing within 3~6 weeks of planting**
- .High tonnages with superb feed values**

### ♣Features:

- .This new hybrid was developed in the U.S.A and tested in South Africa.
- .Multicut has been bred to surpass many of the existing hybrids in dry matter production,protein and content,disease and drought tolerance.
- .Also for rapid re-growth under heavy grazing and unfavourable growing conditions.
- .Under optimum conditions , Multicut will utilize available nutrients and moisture to maximise dry matter and protein production.
- .Good management produces high tonnages with superb feed values.
- .OECD Certified.
- .Treated with Captan,Raldan & Colinel red.
- .Min.Germination:80% and Min.Purity:98%

**✿Benefits:**

- .Multicut can be grazed,cut for hay,silage or fed as green chop.
- .Initial growth is quick,grazing within 3~6 weeks after planting.
- .Re-growth and tillering is rapid.
- .Multicut can grow 50mm a day and to a height of 3m.
- .Multicut can be looked on as stress insurance,recovering well after dry spells and responding rapidly to any available moisture.
- .Multicut will ratoon after hail or insect damage.
- .Because of its versatility,Multicut can be used as high energy feed for high producing dairy or beef cattle,as well as maintenance rations for breeding stock.
