

# KIKUYU(*Pennisetum Clandestinum*) SEEDS

**A robust perennial creeping species which develops thick closely noded runners both below and on the soil surface.**

## ◆ Advantages

- Very Palatable pasture if well fertilized.
- Has a high carrying capacity potential.
- 5 LAU/Ha {September(Spring)~January(Summer)}.
- 3 LAU/Ha {June(Autumn)~September(Winter)}.
- Average dry matter production is 10~12 tons/Ha while 18 tons/Ha of dry matter is possible.
- Crude protein content varies from 8% in winter to 18% in summer.
- TDN=60~70% depending on the maturity of the pasture.
- A very important summer grazing pasture, particularly in Natal.
